## DALLAS-BASED PETROLEUM ENGINEERING FIRMS HAAS ENGINEERING AND W.M. COBB & ASSOCIATES MERGE TO CREATE HAAS & COBB PETROLEUM CONSULTANTS

Combined Firm to Give Clients the Ability to Proceed with Confidence Through Comprehensive Reservoir Engineering and Geologic Solutions

**DALLAS, TEXAS – January 23, 2024** – [Haas Engineering](#) and [W.M. Cobb & Associates](#) announce that effective January 1, 2024, the two firms have merged to create [Haas & Cobb Petroleum Consultants, LLC](#). This expansion will advance the company’s offerings and provide clients with a diverse suite of experience as a full-service geologic and engineering consulting company in the petroleum industry.

“Merging with W.M. Cobb is a great move forward as our companies’ capabilities and services complement each other perfectly,” said Thad Touns, President and CEO of Haas & Cobb Petroleum Consultants. “We’re bringing together two renowned firms to create a comprehensive offering and a new standard in petroleum engineering.”

Haas and Cobb will bring nearly 85 years of best-in-class engineering and geologic services and a fresh approach to the industry while maintaining a boutique, small-firm feel. As one company, we will deliver comprehensive solutions for reservoir description and engineering needs including:

- Independent Reserves Reports and Audit Reports
- Technical Support and Evaluation Studies
- Subsurface Modeling
- Reservoir Simulation
- Enhanced Recovery and Waterflooding
- Gas Storage and CCUS
- Mineral Rich Brine Recovery
- Technical Courses and Training
- Expert Witness Testimony

“Combining with the Haas Engineering team is an exciting change for us and the petroleum industry. We’re looking forward to our new future and how we can better serve clients with our comprehensive list of service offerings,” said Randall Brush, President of WM Cobb and Associates, Inc.

This merger is a significant step forward for both firms. Haas Engineering, which was formed in 1980, and WM Cobb and Associates, which was formed in 1983, are committed to ensuring the business stays true to their shared core objective of providing clients with the highest quality engineering and consulting services available. More details relating to the merger and creation of Haas & Cobb Petroleum Consultants will be announced in the coming months. For more information visit [hassandcobb.com](http://hassandcobb.com).

**About Haas & Cobb Petroleum Consultants, LLC:**

Haas & Cobb Petroleum Consultants is a full-service, third-party petroleum engineering firm based in Dallas, TX. Haas & Cobb provides independent evaluation and consulting services for hundreds of clients, including public and private E&P companies, mineral & non-op companies, investors, and financial institutions. Haas & Cobb’s services include reserves reports & audits, technical support & evaluation studies, subsurface simulation, enhanced oil recovery & waterflooding models, gas storage, carbon capture, utilization & storage, expert witness testimony, and the world-renowned Cobb Waterflooding course.
